

Dear Dr. Shrock;

I just wanted to express my thankfulness for the successful operation. I wish with all my heart that I had listen to my daughter, Angelica, when she told me a few years ago to have my shoulder checked because it did not look right. I know that you did your best with what you had to work. The rehabilitation center you recommended (Health South) as well as the physical therapist, (Ryan McGee) were excellent. I knew that after a while, Ryan was not able to do much since there are parts missing. Angelica believes that I walk better and the back of my body looks much better and symmetrical. I also would like to thank you for recommending Dr. Gervin (the neurosurgeon) who found everything fine and nothing alarming with my syringomalia. My whole experience with your staff has been great. Thank you. My children made a quick decision for me to leave earlier and try to enjoy the rest of the summer in Greece. Dr. Gervin felt that the salt water and the swimming would be very helpful. Ryan gave me a few instructions. So, I am here in Greece trying to swim and relax before I begin traveling again. Thank you for signing the immigration extension. Everything ended up falling into place in a wonderful way.

May God bless you and your family!

Sincerely;

*Aleka Dragotas*

*P.S.*

*I'm doing rehab for the months to follow.*
